

Call for Abstracts for the IMWA 2023 Conference

Dear Mine Water Professionals, Croeso

We call for abstracts for the **IMWA 2023 Conference** in **Newport, Wales** from **17 – 21 July 2023!**

Papers that link the common theme of ‘Mine Water’ to many aspects of science and engineering within mine sites and down the hydrologic gradient from mine sites will be considered. This is broad territory and we have identified the following topics into which we will collect and collate your submissions.

- 1 Mine Drainage Chemistry
- 2 Passive Treatment Innovation
- 3 Water Rock Interactions in Waste Rock and Tailings Storage
- 4 Legacy Mine Assessment, Clean Up & Rehabilitation/Remediation
- 5 Operational Performance of Mine Water Treatment Systems
- 6 Delivering Ecological and Biodiversity Enhancement in Mine Water & Waste Management
- 7 Mine Closure
- 8 Mine Hydrogeology
- 9 The UK approach to managing abandoned mines and mine water – *UK focussed special session*
- 10 Socio Economic & Community Opportunities on Management of Mine Water & Post Mining Landscapes
- 11 Sustainability and Circular Economy Approaches in Mine Water Treatment and Mine Sites
- 12 Mining Operations to Minimise Mine Water Legacy

We are delighted that a collaboration between Welsh Government, Natural Resources Wales, The Coal Authority and Cardiff University has made **#IMWA2023** possible.

We will look for novelty and innovation when we assess your submissions and shall value interpretations with regional or global significance.

Visit the congress website imwa2023.info for full details on submitting your abstract.

Abstracts will be accepted by midnight 24:00hrs GMT (UK) **January 22, 2023.**

Hwyl fawr, Best wishes and Glückauf

Peter Stanley
